

box A Locally Produced Box

It is easy to produce a professional and good-looking box for new business opportunities

- Close to the customer • Just a few hours time of delivery • Many variations
- Small series • Every day

Standard saw

Groove with clips

Build a box and packaging

The idea is to saw a groove and combine with clips the sides to a box

We have tested and designed a system for local production of professional boxes. You can use your own saw for the box and a nail-gun for the pallet. Boards and lumber can be purchased from your regular supplier, and clips are bought from us. We will give you instructions and share our experience concerning **box**. You get a locally produced, good-looking and professional box, a product to meet the demands of the future.

Standard box

Under development

The days for producing large series and for suppliers with long and costly transports will soon be over. We believe that for you, situated in the vicinity of your customers. **box** offers new ideas, environmentally high quality, flexibility and short time of delivery.

Regardless whether you are an end user or a producer, contact us for more possibilities with **box**.
